Asset Tracker

Enterprise Asset Management Solution

What is Asset Tracker?

Asset Tracker Application is a highly customizable one-point solution that has been designed to support enterprises in the management of organizational assets and to optimize operational costs and efficiency.

Values

Ease in Asset Management
Receive all assets information from a single platform such as a number of assets, asset owners and asset users. Asset Tracker makes your asset management effortless.
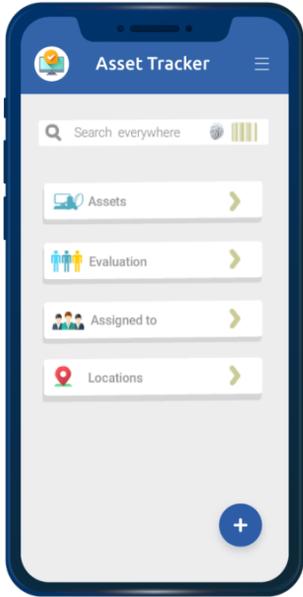

Deal More Efficiently
Get an instant notification and take immediate action in order to keep track of all asset management issues more efficiently.

Increase Asset Lifetime
Take good control of your assets and increase the lifetime of the asset. Check usage asset history, service history and track asset users through the use of Asset Tracker.

Features of Asset Tracker

Asset Tracker

Search everywhere

- Assets
- Evaluation
- Assigned to
- Locations

Asset Particulars
Store details of any assets such as its brand name, model and serial number in order to better understand the performance, ability and upgrade requirements.

Biometric Technology
Identify assigned employees with a scalable biometric matching system. This application can utilize multiple biometric modalities such as fingerprints and facial recognition.

Service History Tracking
Receive a complete history of an asset including general trends of usage, repair and service quality.

Tracking Users
Asset Tracker assists with the tracking of the users of particular assets and the status of the allocated assets. This increases the accountability and increases the lifetime of the assets.

Who can use Asset Tracker?

- Corporate Offices
- Manufacturing Plants
- Power Plants
- Car Rental Companies
- Hospitals & Healthcare
- Educational Institutions

Why Choose Asset Tracker?

Efficiency
This application assists with the managing and distributing of all assets of an enterprise in a distinct way. Asset Tracker assures maximum leverage of assets involving little manpower and increases operational efficiency.

Affordability
The SaaS pricing model ensures that Asset Tracker is affordable for all enterprises, regardless of the scale of the enterprise. This means that any enterprise is able to subscribe to the system according to their business size and requirements.

Accountability
Asset Tracker enables its users to assign assets of an enterprise to an employee. Levels of accountability are raised when an employee is aware that an asset status is being monitored.

Cost Reduction
The asset overview signifies the actual status of the assets considering maintenance, determining durability and replacing the assets at the right time. Asset Tracker also reduces the cost of early damages and unnecessary expenditure.
