

Collaborate, ensure compliance, improve efficiency, and enhance safety for patients and frontline teams with CliniCheck.

## What is CliniCheck?

CliniCheck is designed as a robust and intuitive mobile application to help frontline teams deal better with the ongoing crisis. It improves the frontline teams' readiness, ensures that tasks are performed efficiently, and provides them with verified COVID-19 information.

## Values

### Collaborate Easily

Improving healthcare outcomes during the ongoing pandemic requires effective communication and information. CliniCheck enables users to document and share relevant materials with their peers using their phones - reducing communication delays and improving patient safety.

### Reduce Risks

Hospitals have always been working towards reducing patient safety incidents to improve patient outcomes and employee health. CliniCheck enables users to report incidents from a smartphone and assign resources - reducing the time required and mitigating risks.

### Make Better Decisions

CliniCheck provides users with a fully-customizable checklist as well as a knowledge base regarding COVID-19 that can be used to enhance patient safety as well as the safety of frontline teams by helping them make informed decisions.

## Features of CliniCheck

### Reliable Knowledge Base

By providing a reliable knowledge base that houses content from CDC, WHO, etc., CliniCheck enhances safety for everyone involved during the caregiving process.

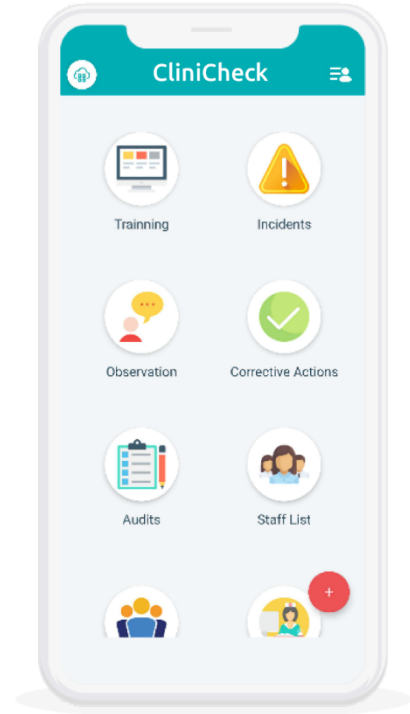

### Incident Reporting

CliniCheck mitigates risks and unwanted consequences by enabling users to report incidents along with photos and/or videos, immediately using their smartphones.

### Customizable Checklist

CliniCheck provides the users with everything required at their fingertips. Preexisting or modified checklists ensure that the proper procedures are being followed.

## Why Choose Fleet Manager?

### Deploy in hours

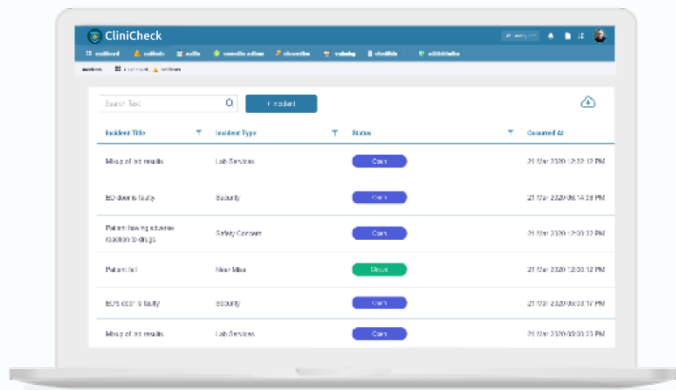

Make data collection fast and efficient by reducing paperwork.

### Enhance efficiency

CliniCheck helps digitize checklists, enhance communication, and improve decision-making.

### Reduce safety incidents

The app improves safety by helping users report incidents immediately - reducing risks.
