

Facility Manager

Powered by  CloudApper®

Facility Manager is a powerful mobile and web application that simplifies and digitizes your facility, asset, and maintenance management tasks.

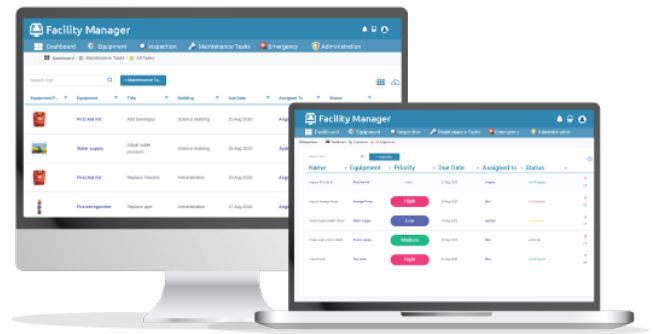

No more blind spots

With Facility Manager, you can access valuable data about your facility operations from a single platform. Stay up to date with all operations by easily reviewing incidents, building plans, maintenance issues, and policies from your mobile device.

Reduce safety & compliance risks

Monitor all operations, reduce safety hazards, and ensure regulation compliance by efficiently inspecting all facilities through an intuitive web and mobile app.

Emergency & maintenance notifications

Receive notifications from Facility Manager about hazardous incidents and maintenance procedures. Make it simple for employees to access all emergency policies and procedures from their smartphone.

Features of Facility Manager App

Facility Monitoring

Monitor all operations that are being conducted across all your facilities in real time.

Emergency Management

Quickly identify emergency protocol, shut-offs, access points, and emergency exits.

Maintenance Management (CMMS)

Reduce the levels of maintenance chaos through efficient work order management of assets and equipment.

Training Management

Share safety manuals, checklists, user guides, and instructions with staff to keep them well informed.

Detailed Inspections

Schedule and conduct detailed inspections of all procedures, operations, premises, and equipment.

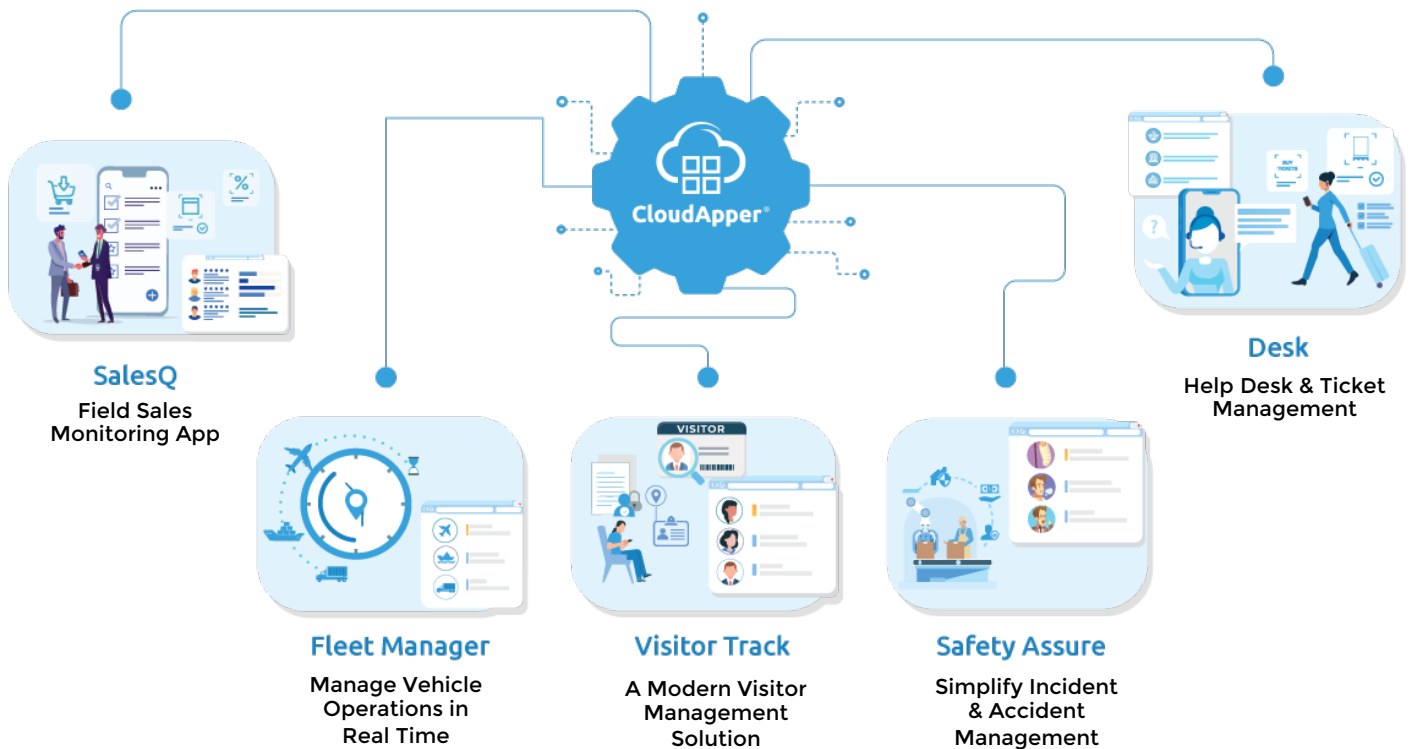

Web & Mobile App

Handle all tasks directly from the mobile app. Managers can access dashboards and reports through the corresponding web application.
