

Fleet Manager

Powered by  CloudApper®

Fleet Manager is a cloud-based solution that utilizes state-of-the-art technologies like biometrics, machine learning, and AI (Artificial Intelligence) to make vehicle management operations smooth, efficient, and cost-effective.

Effortless Fleet Management

Tired of the pile of paperwork? Using Fleet Manager, users can manage drive profiles, schedule fleets, manage fuel costs, and more in no time.

Avoid Information Overload

No more information burnout. Access information from your fingertips using an interactive search bar and manage your fleet efficiently.

Effective Decision Making

Fleet Manager provides valuable insights and reports on fleet operations, driver activity, and maintenance logs to improve decision-making.

Features of Fleet Manager

Analytics Dashboard

Get valuable insight into vehicle movement and usage patterns with an advanced analytics dashboard that supports timely and informed decision-making.

Task Management

Assign, manage, and track fleet management tasks like product delivery and employee transportation with Fleet Manager. The system also provides task alerts so that you don't miss any scheduled tasks.

Remote Inspection

Perform remote inspections from anywhere and anytime you want. With its mobile application, drivers can log the vehicle's status, traffic updates, route changes, accidents, and natural disaster alerts effectively and efficiently.

Location Tracking

Know your vehicle's location in real time. Fleet Manager comes with a sophisticated GPS tracking feature that can track and inform you of your vehicle's location.

Driver's ID Management

With Fleet Manager you can keep a record of your driver's biometric and demographic information, their driving log and license information.

Fuel Log Management

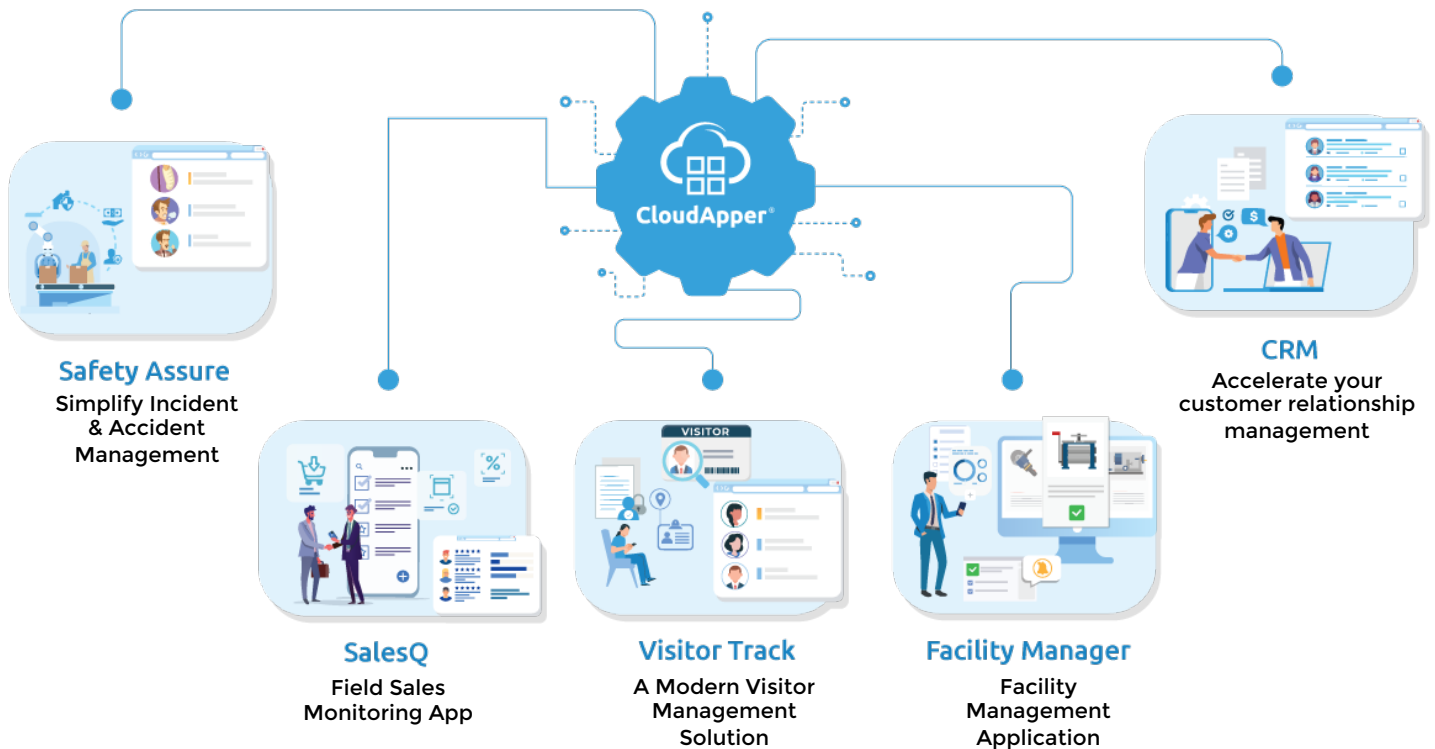

Manage fuel logs and save valuable money. Records can be logged and accessed right from a mobile device.
